INTRODUCTION

100% Business, 100% Space

London Space Week is one of Europe's major b2b space events dedicated to space applications, launch vehicles, satellites and space related technologies.

LSW aims to provide concrete technological answers to project leaders, investors, buyers, space agencies, PRIMES, OEMS, SMEs, ETI or research facilities in search of innovative technological solutions adapted to an industrial project or service.

Participating in an event is often unknown but...

With LONDON SPACE WEEK

90% of this b2b meetings are programmed in advance!

KEY FIGURES

3RD edition

600 participants

4.500 b2b meetings (90% programmed in advance)

1 start-up challenge (with the best 18 start-up selected by the jury)

20 conferences & workshops

SCHEDULE

A) An event focused on 2 thematic

Space industry

Aerothermodynamics / Automation, telepresence & robotics / Components & quality / Electric, electromechanical & electronic / Electromagnetic technologies & techniques / Environmental control life support / Flight dynamics & GNSS / Ground station system & networks / In situ resource utilisation / Mission operation & ground data systems / On-board data systems / Optics / R&D / RF Systems, payloads & technologies / Space debris / Space system control & software / Spacecraft environments & effects / Structures / System design & verification

Space applications

Aeronautics / Agriculture / Cities of the future & land use planning / Construction & public works / Defense / Education / Energy & exploitation / Environment / Fishing & aquaculture / Health / Humanitarian intervention / Insurance & emergency assistance / Ship fleet management / Telecommunication & broadcasting / Tourism / Transport / Water resources

B) 4.500 b2b meetings programmed in advance

Identifying entire projects and the method of double validation guarantee a perfect match between the suppliers' skills and the contractors and decision-maker's requirements for their projects.

The information exchange done beforehand guarantees you meetings exclusively between motivated and identified professionals.

C) Summit

Innovation, new models, disruptive technologies... Attend conferences and meet with the speakers. The conferences take place in parallel with your meetings and are integrated on your planning, according to your requests.

High-level conferences hosted by European innovation personalities and workshops on differentiating themes set over the 2 days.

The last year's program is available on the website, [Click here](#)

Surrey Satellite Technology Ltd / Cnes / Airbus Defence and Space / Plataine / TEN CATE / MSB / GLYCAN / Oxford Space Systems / Effective Space / ESA / Keronite / Thales Alenia Space / UK SPACE AGENCY / PRYOR

D) Start-up challenge

Innovation is at the heart of all space strategies, 18 start-up will be selected by a committee of experts and will compete to win the "LSW start-up challenge".

A wonderful opportunity to be the first to meet future outsiders.

The 18 best start-up will be able to pitch in front of the Jury.

This pitch will be an opportunity for them to present their innovations.
